Antalya, September 19<sup>th</sup>, 2006

### Introduction

- Farmers may consider to change management on their farm and develop strategies for the future to adapt to changing circumstances under new EU policies
- Research part of EU-Twinning project SI04-AG-06 "Farming with quota and premiums"
- **Objective:**
  - ❖ To analyse how farmers think about future strategy and plans
  - ❖ To present the information availability now and the info desired in the future under conditions of new EU policies

Case: the dairy farmers in Slovenia

## Research questions

- What information is received now and how is it received?
- How does the farmer prefer to receive information in the future and what kind of information?
- How farmers think to make decisions in farm management and strategy / future plans to react to the EU policy?

## Material and methods (1)

### Material

- Questionnaire with 27 questions was distributed to dairy farmers anonymously
- 1,114 questionnaires out of 5,000 distributed (22 %) were returned; the sample represent 11 % of total dairy farmers
- Questionnaire was subdivided in groups of questions:
  - Characteristics of farm and farmer
  - What info is received now and how
  - How does farmer prefer to receive info in future and what kind of info
  - How to make decisions on management of the farm and on farm strategy / future plans

## Material and methods (2)

### Method

Three types of variables:

- Continuous (*con*)
- Categorical (*cat*)
- Binomial (*bin*)

**SAS:** means, standard deviation for *con* variables

**SAS:** frequencies or percentage for *cat* or *bin* variables

To establish **associations** between pairs of variables we use the following tests:

Pearson correlation: *con* vs *con*

*con* vs *bin*

*bin* vs *bin*

Chi square test

*cat* vs *cat*

*cat* vs *bin*

One way ANOVA

*con* vs *cat*

(Bonferroni test)

## Results

To characterize the sample of farmers we studied

### Results - *Characteristics of the farm*

Variable (answer)	N	%	Mean	SD
Milk quota for processing plant (1000 kg)	1098		<b>108</b>	110
Milk quota for direct sales (1000 kg)	475		<b>8</b>	10
Average milk production per cow (kg/year)	1059		<b>5473</b>	1504
Agricultural land in use (ha)	1114		<b>17</b>	11
Type of farm (% of total)	1114			
Flat farm		<b>44</b>		
Hilly farm		<b>19</b>		
Mountain farm		<b>14</b>		
Farm with less favourable land		<b>24</b>		
Breed (% of total)	1109			
Only Holstein Friesian cows		<b>13</b>		
Only Simmental and/or Brown cows		<b>41</b>		
Mixed herds (B / Si / HF / Ci)		<b>46</b>		
Milk recording (% yes)	1067	<b>77</b>		
Other farm activities				
Number of fattening bulls	1093		<b>6</b>	6
Land for maize and grain (ha)	379		<b>7</b>	7
Having forestry on the farm (% yes)	809	<b>25</b>		

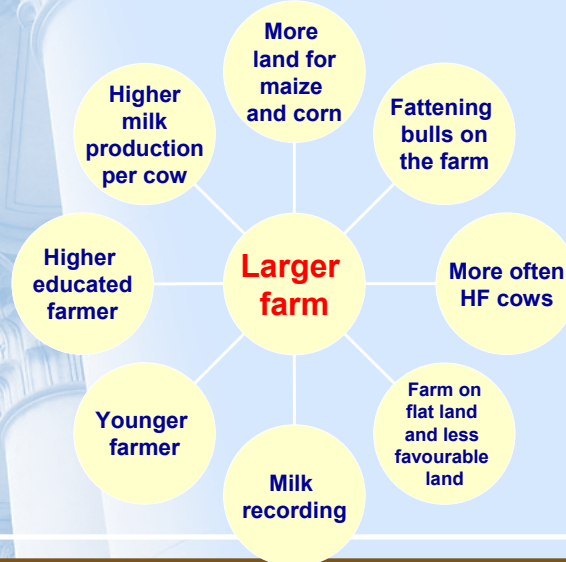

### Results - *Characteristics of the farmer*

Variable (answer)	n	%	Mean
Non agricultural employment of farmer/wife (% yes)	1062	<b>32</b>	
Having a successor on farm (% yes)	1092	<b>69</b>	
Age of farmer (years)	1100		<b>52</b>
Highest education of farmer (% of total):	1103		
Public school		<b>40</b>	
Vocational school/Gymnasium		<b>54</b>	
High school/University		<b>5</b>	

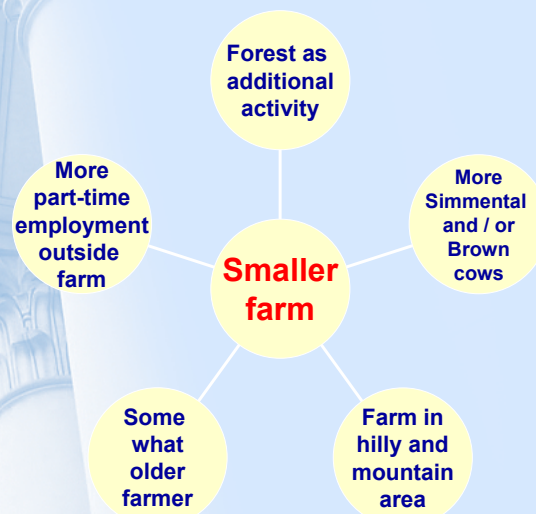

Observation:

This sample of farmers represent the more future oriented farmers!

### Cluster of positive associations

### Cluster of positive associations

## Results – *What kind of info farmer likes to receive*

Questions concerning what kind of info farmer likes to receive	n	%
Would you like more explanatory info about:		
Milk premiums	1114	72
Suckler cow premiums	1114	20
Beef premiums	1114	32
Agricultural environment measures	1114	25
Extensification premium	1114	30
Early retirement program	1114	31
Compensation payment for regions	1114	39
General EU agricultural policies: CAP	1114	62
Do you like advice in adapting daily management of farm to the quota amount you have?	1052	<b>yes</b> 49
Do you like to receive assistance in planning a future plan/strategy for you and your farm?	992	<b>yes</b> 65

## Results – *How to make decisions on farm strategy/future plan*

	Questions about strategy / future plans	n	%
11a	What are your plans for the future of your farm?		
a1	No future plans/ consider to stop farming / keep farm as a hobby	1114	10
a2	I consider <b>to keep farm as it is now</b>	1114	41
a3	I consider <b>to develop farm further</b>	1114	49
11b	If 11a3 - <b>to develop farm further</b> :		
b1	To develop farm by increasing number of cows	541	64
b2	To develop farm by starting with a new branch	541	54
b3	Suckler cows	541	16
b4	Fattening bulls	541	47
b5	Pigs	541	9
b6	Grain, corn, other cultures	541	45
b7	Horticulture / orchard / vineyard	541	8
b8	Horses / agro-tourism / local products / cottage industry	541	10
b9	Forestry	541	12
11c	Do you consider to go in future into organic farming?	663	6
12	Do you plan to invest in new barn or parlour?	787	63
23b	Do you consider to look for part-time work outside farm	<b>yes</b>	6

## Associations between characteristics of farm/farmer and strategy/future plan

<b>Characteristics of the farm</b>	Stop farm	Farm as now	Develop farm	With cows	New activ.
Milk quota for processing plant (in 1000 kg)	*** (-)	*** (-)	***	***	***
Type of farm	*	**	***	**	ns
Breed	**	**	***	***	ns
Milk recording (% YES)	* (-)	*** (-)	***	***	**
Other farm activities (% YES) Land for maize and grain (ha)	*** (-)	*** (-)	***	***	***
<b>Characteristics of the farmer</b>					
Non agricultural employment if farmer/wife (% YES)	ns	*	ns	* (-)	ns
Having a successor on farm (% YES)	*** (-)	ns	***	***	*

## Associations of quota amount with request for expert advice in farm management and in future strategy

Classes in kg of milk	No. of farm	Farm management %	Future strategy %
1 - 25.000	155	31	36
25.001 - 50.000	221	42	48
50.001 - 75.000	184	44	55
75.001 - 100.000	148	50	68
100.001 - 150.000	164	52	67
150.001 - 200.000	74	55	77
200.001 - 250.000	47	53	77
250.001 - 300.000	40	65	78
300.001 - 400.000	30	57	70
400.001 - 500.000	22	59	77
More than 500.000	13	54	69
	1114	46	58

### Associations between breed of cows and plans for the future of farm

Breed of cows	Stop / hobby farm	Farm as now	Develop farm
	%	%	%
Holstein Friesian	7,6	33,8	54,5
Simmental &/or Brown	13,2	46,5	39,6
Mixed herds	6,8	38,2	55,4
Total	9,6	41,1	48,7

### Associations between quota amount and how farmers receive information and advice

Classes in kg of milk	Orally by adviser	Study group	Radio / TV	Agric. Journ.	On paper	Internet
	%	%	%	%	%	%
1 - 25.000	58	41	23	45	27	12
25.001 - 50.000	62	47	22	54	34	15
50.001 - 75.000	67	54	27	57	38	16
75.001 - 100.000	70	47	25	58	42	20
100.001 - 150.000	81	51	24	49	30	22
150.001 - 200.000	68	60	26	54	38	26
200.001 - 250.000	75	51	13	68	28	40
250.001 - 300.000	65	48	18	50	38	38
300.001 - 400.000	60	50	13	50	40	53
400.001 - 500.000	73	73	14	41	36	50
More than 500.000	46	54	8	54	54	39
	67	49	23	53	35	21

## Associations between type of farm and which EU information farmers like to receive

Type of farm	Milk prem.	Suckl. cow prem.	Beef prem.	Agr. env. meas.	Extensificat. prem.	Early retir. prem.	Comp. paym. region.	CAP
	%	%	%	%	%	%	%	%
Flat farm	74	11	33	20	21	31	18	64
Hilly farm	70	28	27	30	32	30	44	56
Mountain farm	64	21	23	33	43	31	44	48
Farm with less favourable land	76	30	39	29	38	30	31	70
	72	20	32	25	30	31	39	62

## Conclusions

- The farmers studied reflect the more future oriented farmers
- Farmers who want to develop farm further have more interest in information about CAP and milk premiums than farmers who think to keep farm the same
- Surprisingly farmers have a very high interest in advice about strategic planning and a lower interest in farm management issues
- Farmers who want to develop have a significant higher request for advice

## Conclusions

- More as half of the developing farmers look for specialisation and about half for diversification
- Diversification plans concern largely agricultural branches. The motivation to go into special products, agro-tourism looks rather limited. This needs further study
- Part-time farming does not look an important factor for choices in farm development, while education does
- Breed and type of farm land are highly associated to the farm structure and future plans

**Thank you for your attention!**
